

Celebrating 40 Years: President's Circle

Building a Better Future Together

For 40 years, the Timber Framers Guild has uplifted and empowered communities and individuals through timber framing.

This work has been made possible through the vision of our founding members and boards of directors over the past four decades. Sharing and learning together is at the heart of everything we do: building our community while building structures for nonprofits, parks, and towns across North America and beyond; researching and expanding knowledge; inviting new people to timber framing through educational programming, volunteer opportunities, and scholarships; and telling the story of this craft.

We look to the future and find ourselves energized. In this anniversary year, we are putting Guild projects and events within reach of every Guild member. Timber frames will make their way into new spaces and places, touch new communities, and welcome those new to our craft - but this is a commitment not just for a special anniversary, it is a commitment to your vision, our mission, and the programs that deliver on them.

As we embark on our next chapter, we invite you to join the President's Circle with a legacy gift, bequest, or pledge for ongoing support of our work.

In the Guild, we embrace our craft, we embrace our friends, we embrace learning, we embrace sharing of knowledge, and we embrace the good in the world and our communities as we make the world a more beautiful place, frame by frame. Guild members past, present, and future thank you for all you have given of yourselves, your hearts, your expertise, and your wisdom - we would not be here without you.

Contact Executive Director Jackson DuBois (ed@tfguild.org) for more information or to become a part of the Guild legacy.
